GitHub: github.com/Anjali-OB | Portfolio: anjali-ob.github.io | Location: Bengaluru, India

PROFESSIONAL SUMMARY

AI/ML Engineer & Data Science Trainer with hands-on experience in Python, SQL, Data Analytics, Machine Learning, and Generative AI / Agentic AI systems. Skilled in building LLM-powered and agentic applications (RAG pipelines, tool-calling agents, multi-step orchestration), delivering practical training sessions, and mentoring students on real-world Data Science and AI projects. Currently a Data Science Mentor at Alliance University, teaching, guiding student projects and conducting placement sessions. Strong expertise in data analysis, visualization, and model development, combined with a passion for teaching and helping freshers build successful IT careers.

CORE COMPETENCIES & SKILLS

Generative AI & Agentic Systems: RAG Architecture, Prompt Engineering, LLM Orchestration, Agentic Workflows (LangGraph, CrewAI), Tool/Function Calling, Multi-Agent Systems, Closed-Loop Planning & Replanning, Vector Databases (FAISS), LLM Integration (Groq, Gemini)

Programming Languages: Python, SQL, Java (Basic), JavaScript, HTML, CSS

Data Visualization & BI Tools: Tableau Dashboard Development, Power BI, Data Visualization & Reporting, Interactive Dashboard Design

Data Analysis: Exploratory Data Analysis (EDA), Data Cleaning & Transformation, Data Interpretation, KPI & Business Metrics Analysis

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, NLTK, Plotly

Frameworks & Tools: Flask, FastAPI, Streamlit, Celery, React 18, Next.js 14, Git/GitHub, GitHub Pages

Databases: MySQL, SQLite, Supabase (PostgreSQL)

ML / AI: Scikit-learn, TensorFlow/Keras (LSTM), DistilBERT, LDA, Random Forest, SVM, NLP, RAG, LLM Integration

Other Skills: Data Accuracy Validation, Dashboard Performance Optimization, Problem Solving, Analytical Thinking, Business Data Insights, Communication, Public Speaking & Anchoring

PROFESSIONAL EXPERIENCE

Data Science Mentor **Sept 2026 – Present**

Alliance University, Bengaluru (through FACE Prep)

- Working in an assistant professor capacity: teaching Data Science and AI/ML concepts, tools and real-world project work to students
- Guiding students through their projects, from problem definition and data work to model building and presentation
- Conducting placement preparation sessions to build technical and employability readiness

AI/ML Engineer Trainer **March 2026 – Sept 2026**

Skill Development Centre, MIDC | Ranjangaon, Pune

- Delivered training in Data Science, Data Analytics, and Machine Learning, covering Python (Pandas, NumPy) and data visualization libraries
- Conducted hands-on sessions using real-world datasets and industry-level projects to build practical skills
- Trained students in SQL, Advanced Excel, Power BI, and Tableau for end-to-end data analysis
- Designed assignments and capstone projects, while mentoring students in portfolio building, resume preparation, and interview readiness

Freelance Python Programming Trainer **Freelance**

Rubicon Skill Development

- Delivered freelance training sessions on Python programming fundamentals and applied concepts to students and early-career learners
- Designed hands-on exercises and practice problems to strengthen programming logic, data structures, and problem-solving skills
- Provided one-on-one and small-group mentoring to help learners build project-ready Python skills

English & Soft Skills Trainer **Nov 2021 – Oct 2024**

Learning Studio | Pune

- Trained 500+ students in communication skills, grammar, and personality development
- Designed structured curriculum, assessments, and performance tracking systems
- Conducted interview preparation seminars and career development workshops
- Delivered online and offline training sessions for diverse age groups (5–55 years)
- Improved student confidence and communication performance through structured evaluation methods

INTERNSHIP EXPERIENCE

Data Science Intern **Aug 2025 – Feb 2026**

AIVariant (ExcelR)

- Developed ML-based resume classification model using TF-IDF and Scikit-learn; applied NLP preprocessing including tokenization and stop-word removal; achieved high classification accuracy in categorizing resumes into predefined job domains
- Built a machine learning model to forecast Apple stock prices for 30-day horizons using financial and sentiment indicators; evaluated model accuracy using RMSE and MAE metrics; implemented preprocessing, feature engineering, and regression models for time-series prediction

PROJECTS

VoiceIQ – AI-Powered Bulk Call Simulator (MCA Final Year Project)

Tech Stack: Python, Flask, React 18, Groq LLaMA 3.3, Supabase (PostgreSQL), Scikit-learn, TensorFlow/Keras, Web Speech API, JWT, Google OAuth

- Built a browser-native, emotion-adaptive AI call simulator using Groq LLaMA 3.3 (70B) and Web Speech API (TTS/STT), eliminating telephony infrastructure entirely; supported multilingual campaigns in English, Hindi, and Marathi
- Orchestrated a multi-agent style pipeline across 6 ML analytics modules: Sentiment Analysis (DistilBERT, F1=88.3%), RF Outcome Predictor (ROC-AUC=0.91), NLP Topic Modelling (LDA), Churn Predictor (F1=0.85), LSTM Call Quality Scorer (R^2=0.868), and Face Verifier (97.3% TPR)
- Implemented real-time per-turn emotion detection (7 classes) with adaptive tone modulation; calls with empathy score above 90 achieved 81.4% positive outcomes vs 18.9% below 60
- RF pre-ranking improved campaign positive outcome rate by 12.6 percentage points; built secure multi-user platform with JWT auth, Google OAuth, and Supabase Row-Level Security

SmartExam – AI-Powered Exam Platform | Live demo

Tech Stack: React 18, Vite, Tailwind CSS, Supabase (PostgreSQL), Google Gemini 1.5 Flash API, SheetJS, Vercel

- Developed a full-stack exam platform for teachers and students with dual-role authentication; teachers can create unlimited tests manually, via AI question generation (Google Gemini), or by uploading files
- Built AI-powered MCQ generator using Google Gemini 1.5 Flash that instantly creates subject-wise question sets; integrated personalized AI feedback for students after each test submission
- Implemented anti-cheat mechanisms (tab-switch detection, randomized question/option order), class performance analytics with grade distribution, weak topic identification, and one-click Excel gradebook export using SheetJS
- Secured with Supabase Row-Level Security ensuring teachers access only their own tests and students see only their own submissions; deployed on Vercel

NEET Prep AI – AI-Powered NEET Preparation Platform | Live demo

Tech Stack: Next.js 14 (App Router), React 18, Groq API (Llama 3.3 70B), SVG, CSS, Vercel

- Built an all-in-one NEET preparation platform with a dashboard (XP system, streaks, progress tracking), a Class 11 and 12 syllabus explorer for Physics, Chemistry and Biology, and a timed quiz engine with 55+ NEET/MHT-CET PYQ questions and explanations
- Created interactive, dependency-free SVG diagrams for Biology, Chemistry and Physics concepts (such as the human heart, DNA, benzene and Young's double slit), plus flashcards and learning games
- Integrated an AI Mentor using Groq (Llama 3.3 70B) with chapter-aware context to explain concepts, solve problems and suggest mnemonics; added full-length mock tests, a spaced-repetition revision scheduler and analytics to identify weak areas

AI Document Intelligence System (DocIQ) | Live demo

Tech Stack: Python, Streamlit, FAISS, Sentence Transformers, Groq API (LLaMA 3), NLP, RAG

- Developed an AI-powered document analysis system using RAG architecture, enabling PDF/DOCX processing with semantic search via FAISS and transformer-based embeddings
- Integrated LLM (LLaMA 3 via Groq API) to deliver intelligent Q&A, summarization, insights, and auto-generation of flashcards, quizzes, glossary, and study notes
- Built and deployed an interactive Streamlit application with optimized chunking pipeline for accurate retrieval, low-latency responses, and scalable performance

Expense Tracker – Private, Offline-First Money App (PWA) | Live demo

Tech Stack: HTML, CSS, JavaScript, pdf.js, Tesseract.js, Cloudflare Workers, Groq, GitHub Actions

- Built an installable, offline-first expense tracker with monthly sheets and balance carry-forward, budgets (50/30/20 planner with 80% alerts), EMI/SIP bill reminders with calendar export, PIN lock and backup/restore; supports English, Hindi and Marathi, with all data stored on the user's device
- Implemented on-device intelligence: naive Bayes category suggestions, month-end spending forecast, unusual-spending detection (median and MAD), repeating-payment finder and a money health score; added bill scanning (Tesseract.js OCR), bank/UPI PDF import (pdf.js) and bank-style PDF statements

- Added a money advisor chat with a built-in finance knowledge base, calculators (SIP, EMI, compound interest) and an optional Groq-powered AI mode through a Cloudflare Worker that keeps the API key secret; tested and deployed with GitHub Actions to GitHub Pages

Real-Time Stock Market Dashboard | Live demo

Tech Stack: Python, Streamlit, Plotly

- Built an interactive analytical dashboard using Streamlit and Plotly to visualize stock market trends; integrated live financial data via APIs and designed visual indicators to support data-driven financial decision making

Deloitte Australia Data Analytics Virtual Experience

Tech Stack: Tableau, Excel

- Cleaned, transformed, and validated datasets to ensure accuracy; built interactive Tableau dashboards to analyze business performance and operational trends (Forage, Oct 2025)
- Developed KPI-driven visualizations and delivered data-driven insights to support strategic decision-making

Business Analytics Dashboard – Power BI

Tech Stack: Power BI, DAX

- Designed and developed an interactive KPI dashboard in Power BI to track organizational performance; performed data modeling, transformation, and DAX-based calculations for advanced analytics
- Enhanced reporting efficiency by 25% through optimized visualizations, filters, and clear data storytelling

Automated Web Scraper with Scheduler

Tech Stack: Python, Celery, SQLite

- Developed automated web scraping solution for dynamic news websites with scheduled execution using Celery; stored structured datasets in SQLite and exported CSV reports, improving data collection efficiency by eliminating manual extraction

EDUCATION

Master of Computer Applications (MCA), Data Science — **Aug 2024 – 2026**

Ajeenkya D Y Patil University | Pune · SGPA: 8.04

Bachelor of Computer Applications (BCA) — **Aug 2021 – May 2024**

MES Garware College of Commerce (Autonomous) | Pune · CGPA: 7.52

HSC, Science — **Jul 2018 – Mar 2020**

Fergusson College | Pune

CERTIFICATIONS

- Data Science Certification (with distinction) – ExcelR Institute, Pune (Nov 2025)
- Data Analytics with Python – NPTEL, IIT Roorkee (Jan–Apr 2025)
- Deep Learning for Natural Language Processing – NPTEL, IIT Kharagpur (Jan–Apr 2026)
- Soft Skill Development (Elite) – NPTEL, IIT Kharagpur (Jan–Mar 2025)
- Deloitte Australia Data Analytics Job Simulation – Forage (Oct 2025)
- Data Science Foundation – Great Learning
- Power BI Workshop – OfficeMaster (Mar 2026); Power BI Level 1 – iStudio (May 2025)
- AI Tools & Claude Workshop (Oct 2026) and ChatGPT & AI Tools Workshop (Sept 2024) – be10x
- Docker & Kubernetes Fundamentals for AI Platform Engineers – Scaler Masterclass (Jun 2026)
- Workplace Ready: Life and Employability Training – Reliance Foundation Skilling Academy (Dec 2024)
